

One Piece Laparoscopic

Handle Options

Selecting a single-piece laparoscopic instrument.

Begin by selecting the handle type that you desire from one of the pictures. Below the picture you will notice a description and part number, the part number of the handle is the first portion of your instruments order number. Next, select the jaw style you desire from one of the pictures. Below the picture you will notice a description and part number again, the part number of the jaw is the next portion of your instruments order number.

(e.g. : KSLR-E300 Slide lock rotating handle with an Allis forceps 5mm diameter).
Standard shaft length is 32cm, plus length of jaw. Custom lengths available upon request.
